

# Secure Data Replicator: Prepared for Respected Leadership

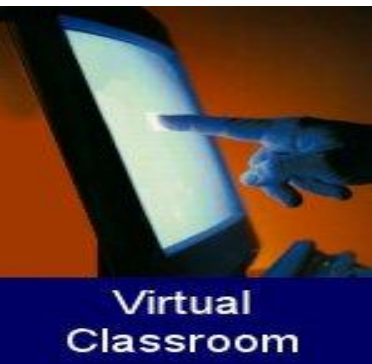

NPH-Virtual Classroom University  
(VCU) and Project Global Link

# NPH VGC Project Definition

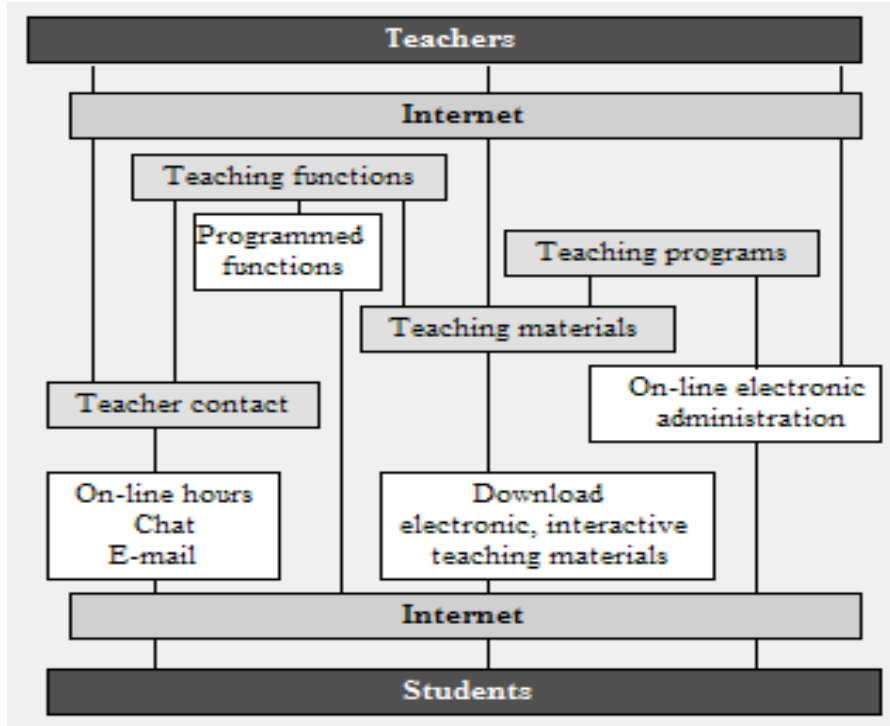

*This project aims at putting together an **integrated** e-Learning environment for any NPH student at various academic levels.*

*This will also be used by **distant and virtual education** programs offered by SDC-NPH qualified and participating institutions, in order to enable students to have real-time access to the NPH academic facilities from any computer connected to the **internet via the Project Global Link Initiative**.*

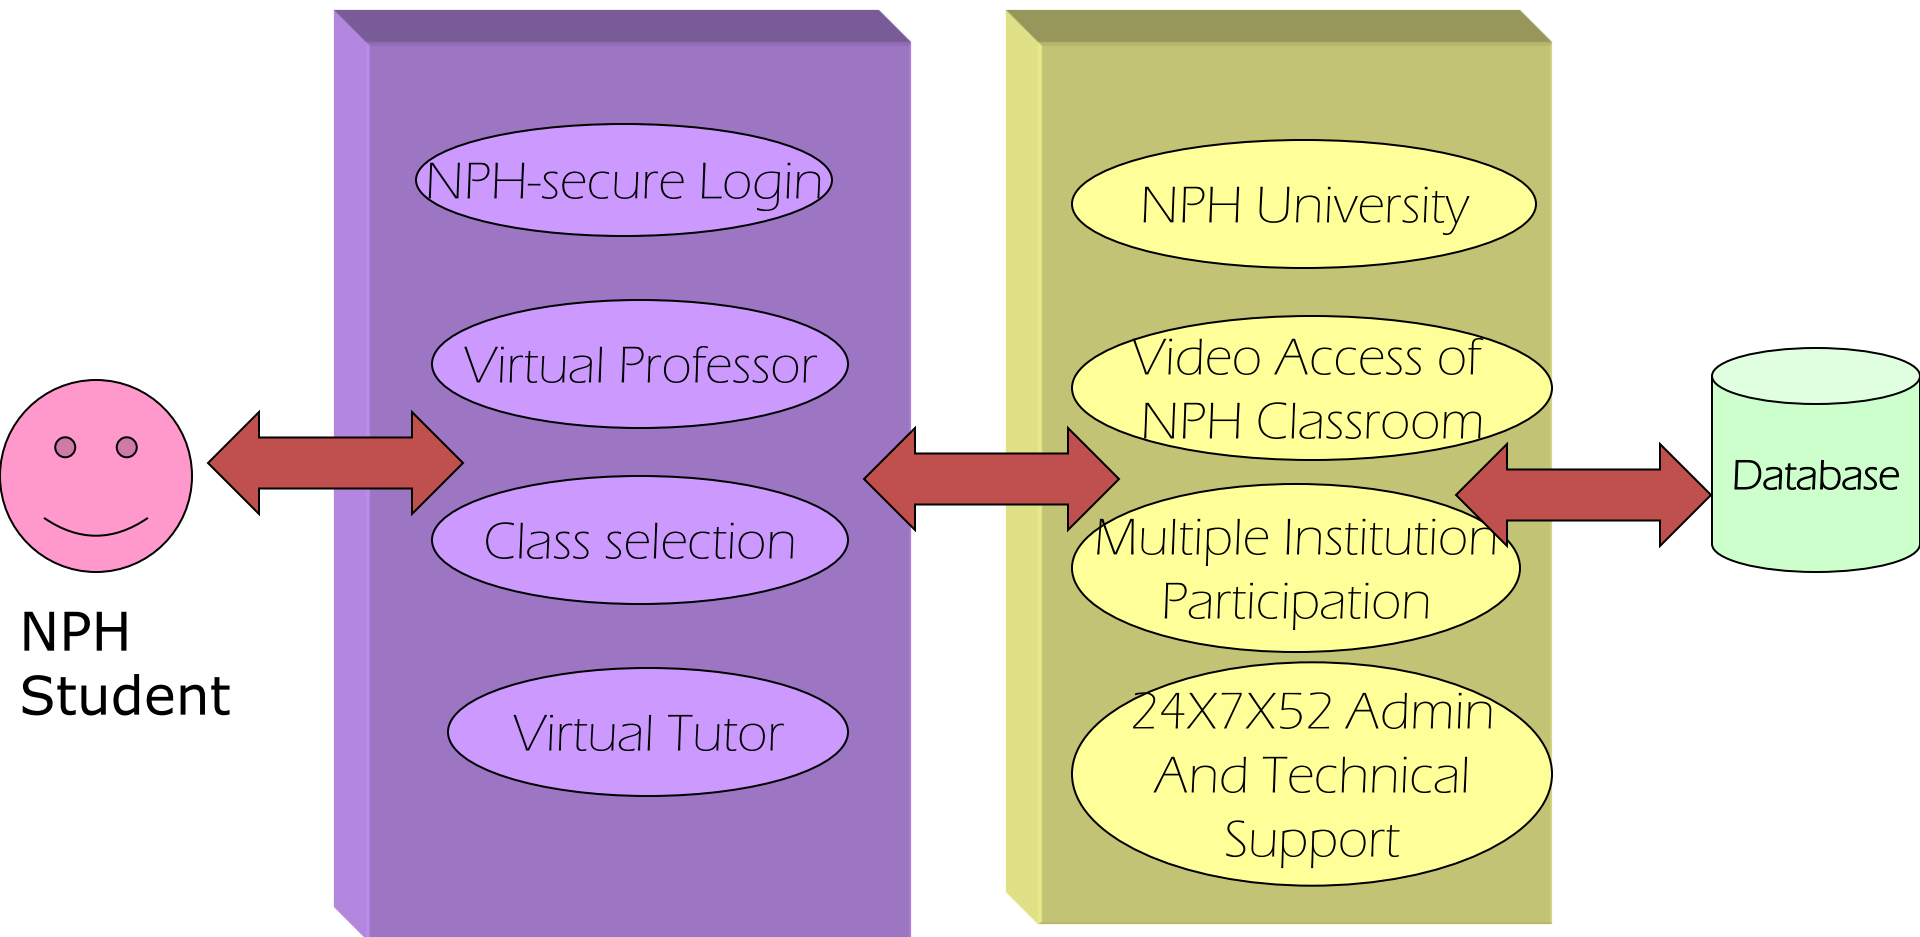

# NPH-Virtual Classroom University

- Rudimentary Model

# NPH-VCU-Architecture Diagram (The Parallel approach)

# SDR's Video/Data Storage and Retrieval Concept

With SDR's solution you can store and protect both DATA and VIDEO images which saves you technical resources, money and data center costs.

DATA FROM ALL DEPARTMENTS

## All cameras

- Reduce costs of data centers
- Reduce electrical/heat
- No technical staff required
- SDR will provide a turn key solution

**Design network connection from the NPHVCU to our data center specific to bandwidth needs and include as part of the total package solution**

## SDR Data Center

SDR will provide a portal(s)  
**NPHVCU.COM**

Access data from remote locations or even home

Allows you to develop file folder(s), COG etc.

**SDR Customer Portal**  
448 byte Encrypted tunnel

# NPH/SDC Nerve Center Network Operations Center (NOC)

 Nuestros Pequeños Hermanos  
International Nerve Center

Dec

**From the US we will send via satellite both internet and telephony trunks service to the Latin American and Caribbean Countries and other NPH campuses.**

INTERNATIONAL

# VCU and Farm System Initiative <sup>SM</sup> (FSI)

- Designed , Deployed and Managed by Secure Data Communications (SDC)
- Collaborative Supplier and Vendor program
- Three phase hiring process
- Training relative to a number of skillsets
- Two-fold Objective :
  1. Introduce potential employees (LAISP County footprint) to SDC opportunities
  2. Position SDC employment candidates toward a “work-ready-state”

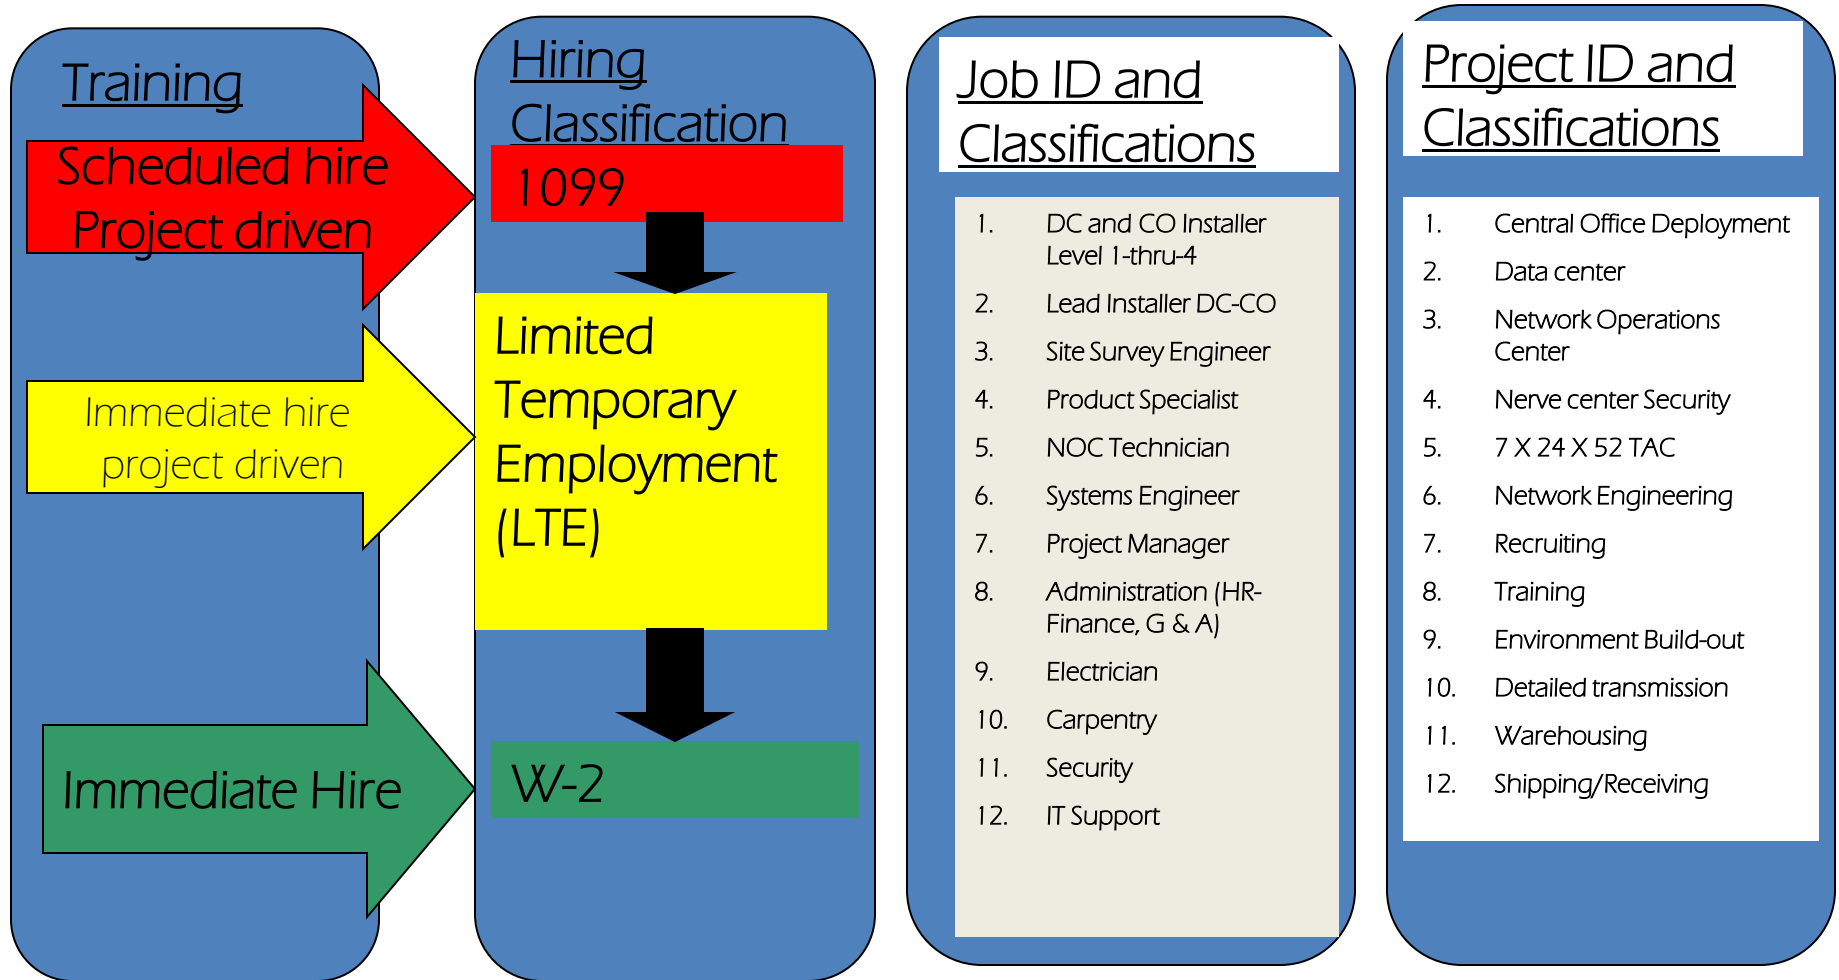

# SDC-FSI-Protocol and Multiple-Facility Integration

- Establish an LAISP-SDC HR Database
- Catalogue candidates basis skillset matrices
- Proceed with communication process in preparation for an LAISP-SDC “open-house”
- Schedule candidates into HR interview process

# SDC-FSI Hiring Progression Model

# SDR Private Cloud Applications

- All NPH and VCU Data is stored through our cloud and is available 7X24&52 globally
- Virtual Desktops and Servers
- Storage and Disaster Recovery

Thank You for allowing us the opportunity  
to share our thoughts
